

## **„New 5008 Therapy System“**

**Statement:** Dr. Emanuele Gatti, Member of the Management Board of Fresenius Medical Care

**Length:** 33 sec.  
**Date:** 17.01.2006

---

**Theme: Advantages**  
**Statement Dr. Emanuele Gatti:**

*Many clinical studies have already proven that what we call online hemodiafiltration is a unique therapy provided by Fresenius Medical Care, that is from the quality point of view the best treatment for the patients. That means longer life expectancy and less complications during the treatment. What we offer now is this treatment for the same cost to the payer as the previous treatment, that has of course less advantages to patients and to the payers.*

**Statement:** Dr. Emanuele Gatti, Member of the Management Board of Fresenius Medical Care

**Theme: Advantages Germany**  
**Statement Dr. Emanuele Gatti:**

*Germany is a perfect location to find this kind of experience in addition to the excellent quality and the excellence in production and logistics. Of course competence is not enough, also you need motivation. And you need to find people like our employees. They have in their focus daily the perfection of our products and the treatment that they deliver to the patients who are treated in our centers.*

**Statement:** Dr. Emanuele Gatti, Member of the Management Board of Fresenius Medical Care

**Length:** 29 sec.  
**Date:** 17.01.2006

**Theme: Development of the new 5008**  
**Statement Dr. Emanuele Gatti:**

*We were founded as an innovative company, because our business model was the first one as a vertically integrated company. We are really vertically integrated in that our employees not only have to do with doctors, nurses and dialysis patients. But they are also responsible for the quality of treatments of these dialysis patients in their daily work. And we treat in our centers more than 130,000 patients worldwide.*

**Statement:** Dr. Emanuele Gatti, Member of the Management Board of Fresenius Medical Care

**Theme:** Explanation of the new 5008

**Statement Dr. Emanuele Gatti:**

*The device is a vital support to dialysis. It means a treatment that cleans the blood of the patients. It cleans blood via a so-called artificial kidney. And the machine supervises the complete treatment, taking care of allowing the blood to circulate into the kidney, controlling the temperature and the dialysis fluid and generating all the necessary alarms for the safety of the patients.*

**Statement:** Dr. Günter Seyffart, Nephrologist

**Length:** 24 sec.

**Date:** 17.01.2006

---

**Theme:** Key improvements

**Statement Dr. Günter Seyffart:**

*The key improvement for me is that hemodialysis and hemofiltration, which are done at the same time because this provides the best stimulation of the kidneys, can now be performed together, online as we say, and automatically without using any additional disposables.*
